

# Scenarios and Personas

Scenarios:

## **Primary scenario:**

The scout reaches the player after evaluating a video of this:

- The player uploads videos to his profile that highlights the individual skills;
- The scout has in its home page a set of highlight videos from players;
- After evaluating each video, if a player stands out the scout may contact him through a message system

## **Secondary scenarios:**

1. Event organizers create and showcase events:

- The event organizers, in the event tab, have a density map which indicates the mass of players per region so these can make an analysis and decide the best place to make the event;
- Event organizers will be able to create and showcase the events where they will be inserted in a map in which will be the description and the place where they will be held;
- Attendees have the option to get the directions from their point to the event location;

2. Professional players share tutorial videos:

- Professional players upload tutorial videos, these will have a special tag and will appear on the homepage of the casual players as well as in the uploader profile.

Personas:

Player - User of any age and gender with interest in competitive video games. Can upload videos to its profile and browse events. It is Divided in two types :

Casual - Uses the website to get a deep understanding, through highlights and tutorial videos of professional players, of how a game plays on a more professional level in hopes of becoming a professional player.

Professional - Uses the website to share knowledge by uploading his own highlights and tutorial videos.

Scout - User that belongs to a certified team and searches through other players highlights and profiles to find one that fits his team.

Event Organizer - User that may or may not have his own event company and has permissions to share and create his events in our event page.

Team Moderator - Manages the teams profile page.
