NFR06	Code reusability	Code can be used to create another platforms related to scouting but in other areas (eg. football)	MEDIUM	
NFR07	Message warning	Users receive an imediate notification as soon as they receive a message	LOW	
SCHEDULE				
Since we are using technologies/programming languages we are not familiarized with, timeframes are bigger to include learning time.				
That being said, we have defined the schedule as such:				
High priority requirements - 2 Weeks to be completed				
Medium priority requirements - 1 Week to be completed				
Low priority requirements - We expect to finish all other requirements with 1 week and a half left until delivery. If there is no delays it will be done within this timeframe				
This is also to ensure high priority requirements are satisfied as soon as possible.
